DETAILED ACTION

Drawings

1. The drawings are objected to because in Figs. 2, 4, 6, 8, 11 and 12, blocks “11” and “15” should be functionally labelled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “power control circuitry for disabling ... the first mode of operation” claimed in claim 2, “a control circuit for measuring ...in dependence thereof” claimed in claims 3 and 4, “a control circuit for measuring ...second radio frequency path” claimed in claims 16 and 23, “a control circuit response to an amplitude ...

Art Unit: 2622

second radio frequency path” claimed in claim 19 and “the mixer circuit comprises an amplifier circuit for amplifying a signal received on the mixer first input port claimed in claim 24 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 10, 14, 28 and 29 are objected to because of the following informalities:

In claim 10 line 3 and claim 39 line 4, “linear” should be--low noise--.

In claim 14, line 9, “first output” should be --front end input--;

Line 11, “seocnd output” should be --front end input--.

Art Unit: 2622

In claim 28, line 5, before "is", --circuit-- should be inserted.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-4, 10-13, 16, 19 and 23-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

"power control circuitry for disabling ... the first mode of operation" claimed in claim 2, "a control circuit for measuring ...in dependence thereof" claimed in claims 3 and 4, "a control circuit for measuring ...second radio frequency path" claimed in claims 16 and 23, "a control circuit response to an amplitude ... second radio frequency path" claimed in claim 19 and "the mixer circuit comprises an amplifier circuit for amplifying a signal received on the mixer first input port claimed in claim 24 are not described in the specification. It is unclear how these claimed circuits are being functioned. Applicant must clarify the above.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2622

Claims 17-19 and 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 17 recites the limitation "the switchably selectable element" in line 3. There is insufficient antecedent basis for this limitation in the claim.

In claims 17 and 18, line 3, it is unclear what "the other of the amplifier circuit and the attenuator circuit" is meant.

Claim 27 recites the limitations "the radio frequency signal", "the mixer" and "the amplifier" in lines 2 and 3 respectively. There is insufficient antecedent basis for these limitations in the claim.

Claim 29 recites the limitation "the measured radio frequency power level", the predetermined level" and "the mixer circuit" in lines 2, 3, 5 and 6. There is insufficient antecedent basis for these limitations in the claim.

Allowable Subject Matter

6. Claims 2-4, 10-13, 16-19, 23-25 and 27-29 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. Claims 1, 5-9, 14, 15, 20-22 and 26 appear allowable over prior art.

Art Unit: 2622

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Freed (6487419) discloses a system and methods for management of current consumption and performance in a receiver down converter of a wireless device.
